# INDIVIDUAL PERSONALISATION OF SWIMMING POOLS

All our concrete pools are designed with full personalization in mind to meet our customers' unique needs and preferences. Whether you dream of a small, intimate pool or a large, spacious pool, we can realize your project in any size and depth.

## POOL LINERS / MEMBRANES

A pool membrane is a material designed to finish the internal surface of the pool area. It is characterized by versatility, ease of installation and care, and easy replacement. Finishing a swimming pool is a serious and responsible matter. From quality and reliability of the materials depend not only on the external appearance of the pool but also on the ease of its care, durability, and cost.

## POOL CANOPIES & COVERS

All canopies in our range can be modified according to the individual needs of each customer. This applies to the length, width, and height of the modules. The canopies consist of several segments sliding on bearing-mounted rollers. This enables you to fold up the canopy and move it outside the swimming pool. The canopies allow you to enjoy your swims during all seasons. They not only reduce the cost of the pool chemicals, and heat energy but also reduce the time needed for pool maintenance.

# CONCRETE POOLS WITH GRADUAL SLOPES & DIFFERENT LEVELS

The concrete pool is a solid and durable structure that allows for complete customization in terms of both shape and depth. We offer the possibility of making the pool with different depth zones, which allows safe and comfortable use by both children and adults.

## POOL LEVEL SPECIFICATION

### \*FLAT ZONE\* - 1 – 1.20 m

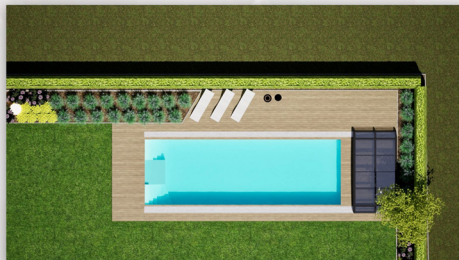

- Ideal for children and those to learn to swim.
- Safe depth for relaxation and water games.

### \*DEEP ZONE\* - 1.50 – 2.20 m

- Suitable for experienced swimmers.
- Suitable for diving and more advanced water activities.

## DESIGN & VISUALISATIONS

We provide a visualization of the concrete pool project.

The visualization of a concrete pool construction project is a key stage that brings a number of benefits. From consultation and planning to the creation of preliminary sketches to realistic 3D renderings.

Every step is important for achieving a satisfactory result.

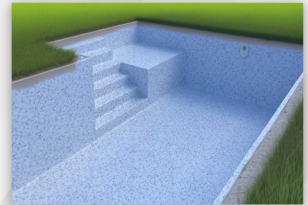

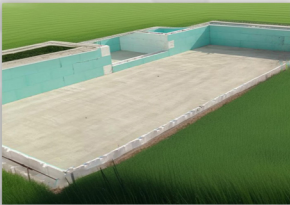

Thanks to modern tools and technologies, visualization allows you not only to see your future pool but also to accurately plan the entire construction process.

# CONCRETE POOL TECHNOLOGY

EPS 25 blocks (expanded polystyrene with a density of  $25\text{kg/m}^3$ ) are widely used in the construction industry due to their excellent thermal insulation properties, lightweight, and ease of installation.

EPS 25 blocks are the perfect material for the thermal insulation of all swimming pools, both new and existing ones.

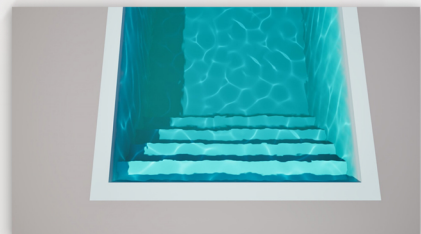

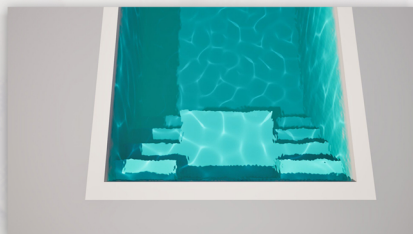

## POOL STAIRS PERSONALIZATION

### 1. Any size and shape

- Larger or smaller – we will adjust the size of the stairs to the available space and your preferences.
- Lower or higher – Adjustable step heights for maximum comfort.
- Shelves – We add comfortable shelves to the stairs, ideal for relaxing or as seating.

### 2. Location according to your requirements

- Any side – The stairs can be placed on any side of the pool, according to your wishes and the layout of the space.
- Integrated into the environment – We offer solutions to harmoniously integrate into the architecture of your garden and pool.

# ADDITIONAL INSTALLATION SERVICES

We are pleased to announce that our company offers comprehensive installation services of polyester pools for individual clients and companies. We are aware of how important it is to have comfortable and trouble-free use of your pool, so we provide full support at every stage of the project.

Our range of services includes:
